

APEX SB AND SC SERIES TOUCH-SCREEN CONTROLLER

The available large format color touch-screen controls make it easier than ever to “Do More” with your Apex SB and SC Series Robots. The graphical user-interface format of this fully end-user programmable robot allows even first time automation users to create advanced routines in support of nearly every application imaginable. This flexibility is all made possible by an on-board Windows® based computer operating system, delivering the power in an easily understood format.
