

BULK STORAGE SERIES

Container Tilters

EASY PRODUCT REMOVAL IN HALF THE TIME

Container Tilters allow you to tilt containers to their corners or side for easy product removal. Our tilter units work on as little as 40 PSI, and have been designed to load at floor level or low profile. Keeping safety in mind, a patented safety locking system is also available. Also, by activating the hand button, the regulator will automatically tilt at a predetermined weight. For materials that will not flow freely, Sterling offers a vibrator option.

Floor Level, Corner Tilt Container Tilter
