

Floor Mount Large Drying Hoppers

HIGH ENERGY EFFICIENCY FOR OPTIMIZED DRYING

SH Series drying hoppers are for the drying of thermoplastic pellets and regrind, as part of a drying system.

Sterling drying hoppers are designed for continuous 24-hour operation, and meet all European CE requirements.

Sterling drying hoppers are constructed of carbon steel, or stainless steel. Material and air flow have been carefully engineered for optimum drying results at high energy efficiency. The hopper is insulated into the discharge cone, preventing heat loss while serving as effective protection against accidental contact.

Features

- Carbon steel construction
- Extra large access door
- No gaskets
- Long sight glass on door
- Insulated, with extra insulation on cone
- Machine-, floor-, or mezzanine-mount
- Slide gate
- Drain port

Options

- Stainless steel construction
- Level sensors for material level sensing
- Rack and pinion slide gate
- Air operated discharge with material stub, less controls
- Adapter to mount SSR85/170 vacuum receiver
- Drawer magnet
