

STERLCLEAN SERIES

De-Scaling System and Fluid

EFFECTIVE, EFFICIENT REMOVAL OF SCALE, LIME AND RUST DEPOSITS

Sterling is proud to offer a proven method to remove these deposits—the Sterlclean De-Scaling System and Fluid. Sterlclean is designed to work with Sterling temperature control systems—or any other brand—as well as other water equipment where clogging can reduce efficiency and performance.

The Sterlclean De-Scaling System is portable and easy to operate. The system operates on any 110V outlet and connects easily to your processes with quick-attach hoses. It is designed specifically to circulate Sterlclean De-Scaling Fluid, a powerful, yet environmentally safe liquid, that is non-toxic, non-flammable, non-hazardous, non-corrosive and biodegradable. It quickly dissolves build-up without danger to equipment, personnel or the environment.

Features

- Compact footprints
- A complete system—everything you need to remove any rust, scale or lime
- Portable, lightweight and easy to install
- Maintains peak performance and efficiency
- Extends the useful life of your equipment
- Dissolves deposits on the water side of your equipment
- Non-toxic, non-injurious, non-corrosive, non-flammable and can be disposed of in normal plant sewers
- Will not erode, pit, oxidize or harm metal and other materials
- USDA-approved

For De-Scaling Of:

Heat Exchangers, Piping Systems, Molds, Dies, Tanks, Pumps, Rolls, Water Stills, Radiators, Condensers, Mixing Valves, Compressors, Boilers, Water Heaters

STERLCLEAN SERIES

De-Scaling System and Fluid

De-Scaling System

Model	Operating Temp.	Motor (HP)	Voltage (1ph, 60 hz)	Full Load Amperage	Dimensions L x W x H (in.)	Shipping Weight (lb.)
De-Scaling System	Ambient	1/2	115	8.4 amps	22x16x28	115
